

# EMMANUEL ABET ROSSI PAAYS

Jakarta, Indonesia | +62 896-9803-6224 | emmanuelabetrossipaays@gmail.com

## PROFESSIONAL SUMMARY

Highly dedicated Computer Science graduate from Universitas Nasional with a strong academic track record, completing a bachelor's degree within 3.5 years with a cumulative GPA of 3.73/4.00. Possesses proven capabilities in enterprise systems development alongside internationally certified expertise in Artificial Intelligence (AI), Web3 decentralized applications, and Multi-Criteria Decision-Making (MCDM) systems. An articulate, analytical, and adaptive professional with advanced English proficiency (TOEFL score 610). Highly ambitious to leverage structured strategic logic, technical project life cycles, and analytical data modeling to drive enterprise digital transformation within high-velocity global management tracks.

## EDUCATION

### UNIVERSITAS NASIONAL

Jakarta, Indonesia

Bachelor of Computer Science (S.Kom.), Informatics

Graduated: March 2026

- GPA: 3.73 / 4.00** (Graduated with Highest Distinction / Cum Laude).
- Academic Acceleration:** Completed the full undergraduate degree curriculum within a condensed 3.5-year timeline.
- Institutional Accreditation:** Awarded "Unggul" (The highest national excellence tier distinction by BAN-PT).

## PROFESSIONAL CERTIFICATIONS & CREDENTIALS

- Artificial Intelligence Specialist** | Certiport (A Pearson VUE Business)  
*Credential ID: Fdwm-XMLVs (Global IT Competency Credential, Valid until October 2030)*
- Certified Junior Web Developer** | National Agency for Professional Certification (BNSP)  
*Registration No: TIK.317.00060 2026 (Official Indonesian National Professional Competence Credential)*

## CORE RESEARCH & ENTERPRISE PROJECTS

### Scientific Journal Publication & Undergraduate Thesis

Principal Researcher & Author

Project: Forest Fire Geospatial Visualization Model Development Using MCDM Integrated with Blockchain and GIS

Term: 2025 – 2026

- Designed and developed a decentralized application (DApp) integrating **React.js** for interactive frontend geospatial dashboard visualization and **Python (Web3.py)** for backend script execution.
- Engineered a comprehensive spatial evaluation model leveraging **Multi-Criteria Decision Making (MCDM)** frameworks to systematically evaluate and map environmental disaster risks with high mathematical precision.
- Integrated localized **Blockchain architecture via Ganache network** and cryptographic transaction validation through **MetaMask wallet integration** to guarantee immutable data integrity and system auditability.
- Peer-reviewed and published research findings in a recognized National Scientific Journal (**SINTA**), validating competencies in advanced technical architecture design.

### Enterprise System Design Project

Technical Project Lead

Project: Ticketing Complaint System Design with Structured Approach (SADT) at Universitas Nasional

Term: Mar 2025 – Aug 2025

- Served as Technical Project Lead for a structured capstone enterprise design simulation, orchestrating cross-functional system engineering workflows and delivering a comprehensive deployment artifact evaluated with an 'A' grade.
- Utilized **Visual Paradigm** to architect hierarchical Structured Analysis and Design Technique (SADT) blueprints, mapping Context Diagrams and data workflows for university-wide operations.
- Leveraged **ProjectLibre** to manage project lifecycles, critical paths, task assignments, and timeline allocations to guarantee systematic resource optimization.

## ORGANIZATIONAL LEADERSHIP & ENGAGEMENT

### Informatics Student Association (HIMTI) Universitas Nasional

Jakarta, Indonesia

Active Member – Creative Media Sub-Division (Science & Technology Division)

Term: 2024 – 2025

- Orchestrated digital asset pipelines, student technical community marketing initiatives, and coordinated cross-functional media graphics for organization events.
- Appointed as Active Executive Committee Member for the national technical workshop "Creating News App with Flutter" (July 2024), managing technical operations and delivering multi-tier user troubleshooting.

## TECHNICAL & MANAGERIAL COMPETENCIES

- **Enterprise Web3 Infrastructure:** Cryptographic Blockchain Architecture (Ganache Local Network Development), Web3 Wallet Integration (MetaMask Gateway Authentication), Geographic Information Systems (GIS / Geospatial Data).
- **Strategic & Managerial Logic:** Multi-Criteria Decision Analysis (MCDM), Project Management Lifecycle, Critical Path Method, Structured Analytical Thinking.
- **Languages, Frameworks & Tools:** Python, React.js, JavaScript, HTML5 / CSS3, Visual Paradigm, ProjectLibre, Microsoft Office Suite.

## LANGUAGE PROFICIENCIES

- **English:** Full Professional / Advanced Operational Fluency  
*Official UNAS English Proficiency Test (TOEFL Equivalent) Score: 610 (Listening: 590, Structure: 630, Reading: 610)*
- **Bahasa Indonesia:** Native
